**Quote for taking over the yearly emergency light test , this will be a 3 hour test , but I need to familiarise my self with the layout and setup , so this will take me a day going through it and labelling it up , so cost of this 1st one would £ 300**

**E.i.C.R , quote to carry out an electrical test and inspection & 100% visual inspection and 100% on testing would be a 2 day job , I would need to go through this all as I've never testing it before , would need to do a 100% visual inspection, so this would be require taking every switch off, socket off , inspect every light fitting and any final circuits in the distribution board, so some MCB'S will require replacing to RCBO'S to give RCD protection to the lighting circuits as general public are in and out , the cost of this job would be £ 600 + the price of any RCBO'S , and think from last visit , about 4 or 5 I believe will need swapping out**

**Total cost of these 2 jobs is £ 900 + any materials required**

**ALL Invoices to be paid at time of completion of work**
