

Agenda Item 8

Hello there,

Hope this email finds you well!

I live around the corner on evergreen heights, I spoke with your gardener/maintenance guy a number of years ago and kindly asked him if he could plant some tall growing plants/trees at the back of my fence as the community centre doesn't look great from my back garden, he did and I'm very grateful but as they were just growing over the top of the fence last year they were then cut back so still I have an unfortunate view. As said to your maintenance guy, I have tried multiple times to grow trees at the back of my garden but unfortunately, they never last. When I brought the property 7 years the old owners chopped down large conifers for the sale which has made the soil difficult to grow anything. I've managed to keep a few bits alive but they don't spread or grow. It's a shame as the rest of my garden is flourishing but I'm hoping with this email and the photos added, if what's planted on your side of the fence if possible doesn't get a trim this year please? I understand it's the back of the centre so doesn't get as much attention as the rest looks absolutely stunning; The paintwork & masking tape doesn't look great from my living room/back garden & I will offer to volunteer to help paint it if that is an option to.

Honestly, I've put off saying anything for years because it's a lovely community centre, I work at one in Burntwood & understand it's key for many within our community so very grateful we have one, I've been a few times as well so I hope this doesn't come across as a complaint as it's simply a request for a nicer daily view if possible.

Thanks for your time.
